EXPERIENCE

Pratt & Whitney

May 2024 – Present

Associate Director, Operational Excellence, Capital Procurements

- Developed and maintained capital expenditure models to support business forecasting and budgeting processes, including cash management, capacity needs, and strategic initiatives
- Responsible for long range (capital) planning across all P&W Operations, Engineering, and Aftermarket (MRO) module centers, totaling >\$500M per year in machine tool, tooling, and facilities spend
- Managed strategic supplier relationships and was primary point of escalation for contract enforcement and disputes. Provided data-driven supplier scorecards and health metrics for machine tools to support negotiations and Master Terms Agreements (MTAs)
- Led team of ten project managers responsible for executing >\$200M of machine tool procurement yearly

Senior Manager, Manufacturing Engineering & Operations

Feb 2022 – May 2024

- Established and maintained general equipment standards across P&W, with cross-functional feedback from EH&S, MTS, and Manufacturing Engineering teams
- Modernized and established new procurement workflows in AgilePoint and helped reduce process times by up to 20%, or more than 60 days
- Responsible for data sanitization and visualization to help interpret and drive company-wide spend profiles
- Led team of five developers to design and program the largest (to-date) AgilePoint application at RTX for capital execution

Principal Engineer, Manufacturing Engineering & Operations

Feb 2017 – Feb 2022

- Oversaw procurement of hundreds of capital equipment projects totaling more than \$25M per year
- Wrote technical specifications identifying critical processes and guiding design concepts for external vendors and helped standardize to a core library of cutting-edge machine specifications
- Negotiated commercial (pricing, payment structure) and legal terms and conditions to reduce cost and risk
- Validated and led acceptance tests for all projects, including material handling automation equipment, machining and inspection systems, and CNC and welding equipment, etc.
- Provided EAR and ITAR classifications for export of sensitive technical data

EDUCATION

University of Connecticut

M. Eng, Electrical Engineering

May 2019 – Dec 2020

Cornell University

M. Eng, Mechanical Engineering

Jan 2016 – Jan 2017

B.S., Mechanical Engineering

Aug 2012 – Jan 2016

Minors: English

SKILLS

ANSYS, C#, CSS, Export Administration Regulations (EAR), Docker, HTML, International Traffic In Arms Regulations (ITAR), JavaScript, KiCad, LaTeX, MATLAB, Microsoft Access, Nginx, Python, React, SolidWorks, Visual Basic for Applications (VBA), Structured Query Language (SQL), Vue, Wordpress
